## Summary

The goal of this code is to pull and summarize utilization data for services related to VA's Whole Health (WH) and Complementary Integrative Health (CIH) programs during fiscal year 2021. WH and CIH activities are broken into the following categories:

- Acupuncture (traditional and battlefield)
- Biofeedback
- Chiropractic Care
- Guided Imagery
- Hypnosis
- Massage
- Physical Therapy
- Tai Chi
- Yoga
- WH Clinical Care
- WH Activities
- WH Coaching

Further, the following CIH therapies are defined as having occurred in VA or the community:

- Acupuncture (traditional and battlefield)
- Biofeedback
- Chiropractic Care

Code for this project is maintained on the Seattle research drive at the following path:

- J:\OPCCCT\_CIHEC-QI\CIH WH utilization

SQL databases are maintained here:

- Server: RB02
- Database: OPCCCT\_CIHEC, OPCCCT\_EPPCVA
- Schema: WH\_CIH

Final Tables (final versions of utilization pulled in FY22):

- WH\_CIH\_FY17\_Visits\_VA\_FY22\_legacy
- WH\_CIH\_PatdayFY17\_CC\_FY22\_legacy
- WH\_CIH\_PatdayFY17\_VA\_FY22\_legacy
- WH\_CIH\_FY18\_Visits\_VA\_FY22\_legacy
- WH\_CIH\_PatdayFY18\_CC\_FY22\_legacy
- WH\_CIH\_PatdayFY18\_VA\_FY22\_legacy
- WH\_CIH\_FY19\_Visits\_VA\_FY22\_legacy
- WH\_CIH\_PatdayFY19\_CC\_FY22\_legacy
- WH\_CIH\_PatdayFY19\_VA\_FY22\_legacy
- WH\_CIH\_FY20\_Visits\_VA\_FY22\_legacy
- WH\_CIH\_PatdayFY20\_CC\_FY22\_legacy
- WH\_CIH\_PatdayFY20\_VA\_FY22\_legacy
- WH\_CIH\_FY21\_Visits\_VA\_FY22\_legacy
- WH\_CIH\_PatdayFY21\_CC\_FY22\_legacy
- WH\_CIH\_PatdayFY21\_VA\_FY22\_legacy
- WH\_CIH\_FY22\_Visits\_VA\_FY22\_legacy

- WH\_CIH\_PatdayFY22\_CC\_FY22\_legacy
- WH\_CIH\_PatdayFY22\_VA\_FY22\_legacy

## Coding Algorithm

There are two different coding algorithms, one for VA visits and another for visits recorded in the community.

### VA Visits

Summary of steps:

1. Identify WH/CIH visits using applicable data sources. Not all therapies use all data sources. Codes and search terms can be found in [these tables](#). Search terms are used by including all matches that are found in the inclusion terms but not in any of the general or specific exclusion terms.
  - a. [CHAR4 Codes](#)
  - b. [CPT Codes](#)
  - c. [Stop Codes](#)
  - d. [Health Factors](#)
  - e. [Location Names](#)
  - f. [TIU Note Titles](#)

2. Consolidate visits across all data sources. The resulting table looks like below, with indicator variables showing by which methods each visit was found:

| VisitDate  | Therapy     | VisitSID    | CHAR4 | CPT | StopCode | ... |
|------------|-------------|-------------|-------|-----|----------|-----|
| 2021-01-01 | Hypnosis    | 16982734928 | 1     | 1   | 0        | ... |
| 2021-01-04 | WH-Activity | 24379238742 | 0     | 0   | 1        | ... |
| ...        | ...         | ...         | ...   | ... | ...      | ... |

3. Exclude visits with certain community care and admin stop codes. The community care visits are processed separately as shown in the next section.
4. Exclude some visits found only by location name or by note title.
  - For **location name only visits**, we check the note titles associated with those visits, and exclude visits with red flag note titles. See the table [Note Title Exclusions](#).
  - For **note title only visits**, we check the location names associated with those visits, and exclude visits with red flag locations. See the table [Location Name Exclusions](#).
5. Exclude some visits identified as multiple CIH or WH therapies.
  - For CIH visits, exclusions are applied depending on which methods were used to identify the visit (e.g., CHAR4, CPT, etc.). Some overlap between CIH visits is permitted based on the exclusions criteria. See section [Exclusions Across CIH Visits](#).
  - For WH visits, exclusions are applied based on a hierarchy. The WH categories are mutually exclusive with no overlapping visits. See section [Exclusions Across WH Visits](#).
  - Any overlap between WH and CIH visits is permitted.
6. Reduce to a patient-day table. A given patient can only have one visit per therapy and facility on any given day. For instance, multiple yoga visits for Patient X and Day Y at StaPa Z will all be reduced to a single yoga visit. A single patient can receive some of the same therapy on the same day, given they were at different facilities, or they can receive multiple therapies on the same day.

### Community Visits

1. Collect all visits from community care tables by CPT codes. Only professional (not institutional) claims are collected.

2. Reduce to a patient-day table using the same logic as for VA visits step 6.

## Data Sources

| Element                 | Element Type | VA or CC | Source Table(s)                        |
|-------------------------|--------------|----------|----------------------------------------|
| <b>VA Visits</b>        | Visit        | VA       | CDWork.Outpat.Visit                    |
| <b>Community Visits</b> | Visit        | CC       | CDWork.PIT.PITProfessionalClaimDetails |
| <b>CHAR4</b>            | Code         | VA       | CDWork.Dim.DSSLocationStopCode         |
| <b>CPT</b>              | Code         | VA       | CDWork.Dim.CPT                         |
| <b>Stop Codes</b>       | Code         | VA       | CDWork.Dim.StopCode                    |
| <b>Health Factors</b>   | Search Term  | VA       | CDWork.Dim.HealthFactorType            |
| <b>Location Names</b>   | Search Term  | VA       | CDWork.Dim.Location                    |
| <b>Note Titles</b>      | Search Term  | VA       | CDWork.Dim.TIUDocumentDefinition       |

## Codes and Search Terms

### CHAR4, CPT, and Stop Codes

|                         | CHAR4 Codes                                          | CPT Codes                                                                                                                           | Stop Codes                              |

## Exclusions Across Therapies

Some visits were associated with multiple WH/CIH therapies. We applied exclusions to overlapping visits within CIH therapies and within WH categories. All overlap between WH and CIH visits were permitted.

### Exclusions Across CIH Visits

Visits identified as multiple CIH therapies were categorized as having either “strong” or “weak” evidence based on the search methods used to identify the visit:

- Strong evidence: visit was identified by CHAR4, CPT, health factors, and/or note titles
- Weak evidence: visit was identified by location name and/or stop codes

Exclusion criteria for overlapping CIH visits

- All visits with strong evidence (with or without weak evidence) were included.
- Visits with only weak evidence
  - Included if other overlapping CIH therapies were identified using only weak evidence. Chiropractic visits are the exception; these were excluded if other overlapping therapies were identified using only weak evidence.
  - Included if no other overlapping CIH therapies were identified.

### Exclusions Across WH Visits

Visits identified as multiple WH categories were excluded based on a hierarchy:

1. WH-Clinical

2. WH-Coach
3. WH-Activities

For example, if a visit was identified as both WH-Clinical and WH-Coach, the visit was excluded from the WH-Coach category. If a visit was identified as both WH-Coach and WH-Activities, the visit was excluded from the WH-Activities category. The three types of WH visits are mutually exclusive.

## Change Log

| Date                | Description                                                                                                                                                                                                                                                                     | Documentation                                                                                                | Decision Maker |
